### BSCE Major Coursework

The BSCE degree covers six areas of interest: **Construction, Environmental, Hydrology, Geotechnical, Structural, and Transportation.** The 300-level CEE Core Curriculum provides a foundation in all areas. Technical Electives and Engineering & Science Electives, typically taken in the senior year, allow students to develop depth in their preferred area(s) of interest. Seniors also complete a capstone design course in an area of their choice.

#### Core Curriculum (40 credits)
*(See sample 4 year plan on page 2 for core curriculum sequencing (Track 1 and Track 2))*

- Construction Engineering (CEE 307) 5cr
- GeoSurveying (CEE 317) 5cr
- Transportation Engineering (CEE 327) 5cr
- Construction Materials (CEE 337) 5cr
- Intro to Fluid Mechanics (CEE 347) 5cr
- Environmental Engineering (CEE 357) 5cr
- Geotechnical Engineering (CEE 367) 5cr
- Intro to Structural Design (CEE 377) 5cr

#### Capstone & Professional Practice (7 credits)

- Capstone Design Course 5cr
  - CEE 441, 442, 444, or 445, taken SPR qtr of senior year
- Professional Practice (CEE 440) 2cr
  - CEE 440 is taken in junior year.

#### Technical Electives (TE) (15 credits, 3 areas)
- Technical Electives are CEE 400-level courses that provide students with in-depth knowledge and design experience.
- **Area Requirement:** Students are required to take at least 3 credits from 3 of the 6 areas. (see BSCE TE list for details)

#### Engineering & Science Electives (E&S) (12 cr.)

Choice of additional CEE Technical Elective courses or courses from an approved list. See the BSCE E&S Elective list for complete details.

#### General Electives

Additional credits to meet the 180 total required for the BSCE degree.

#### Academic Planning Notes:
- Areas of Inquiry courses can also count toward Diversity and Additional Writing. Use MyPlan filters to identify courses that satisfy multiple requirements..
- CEE Study Abroad opportunities are a great way to satisfy degree requirements.
